👁 Note!

Please note that there can be small differences between your product and the images in these instructions.

👁 Note!

Please note that during storage and transport, especially at high ambient temperature, some of the oil and grease used for assembly may leak and stain the packaging. This will not cause damage to the product, wipe off the excessive oil or grease with a cloth.

👁 Note!

Before you install this product, check the kit contents. If anything is missing, please contact an Öhlins dealer.

⚠ Warning!

Before you install this product, read the Öhlins Owner's manual. This product is an important part of the vehicle and the vehicle stability.

Shock absorber for KTM 790 Duke

KT 790

Mounting Instructions

MOUNTING INSTRUCTIONS

⚠ Warning!

We strongly recommend to let an Öhlins dealer install this product.

⚠ Warning!

If you work with a lifted vehicle, make sure that it is safely supported to prevent it from tipping over.

👁 Note!

When you work with this product, see the vehicle service manual for vehicle specific procedures and important data.

👁 Note!

Before you install this product clean the vehicle.

1.

Put the motorcycle on a work stand so that the rear wheel barely touches the ground.

2.

Remove the plastic plug on the left hand side to uncover the upper shock absorber screw.

3.

Remove the lower shock absorber screw.

4.

Loosen the screw / nut at the right hand side of the lower shock absorber mount 0.5-1 turn by turning it clockwise (left hand thread).

5.

Remove the upper shock absorber screw and shock absorber.

6.

Mount the Öhlins shock absorber with the hose facing down. Mount the upper and lower screws, but do not tighten yet.

7.

Lower the vehicle so that the suspension is slightly compressed. Tighten the screw / nut at the right hand side of the lower shock absorber mount by turning it anti-clockwise (left hand thread). Make sure that the long screw does not tighten at the same time. Then tighten the long screw and the upper screw. Refit the plastic plug.

8.

Remove the left hand side passenger foot rest.

9.

Mount the washers, bracket and foot rest back (in that order) using supplied screws; M8x40 in front and M8x50 in rear.

10.

Mount the reservoir bracket to the bracket using supplied screws M6x12. The clamp screw (M6x14) should face downwards.

11.

Slide the reservoir into the reservoir bracket and rotate it so the hose is in a good position. Clamp on the big diameter.

MOUNTING INSTRUCTIONS

ADJUSTMENTS

⚠ Warning!

Before you ride/drive, always make sure that the setup is according to the recommended setup data. Read about adjustments and setting up in the Öhlins Owner's Manual before you make any adjustments. Contact an Öhlins dealer if you have any questions about setting up.
